"We recommend OSG because they are customer-focused, honest, hardworking, team-oriented, and willing to go the extra mile."

*Joe A. - General Manager
(Portfolio Services)*

Experience. Trust. Results.

It is difficult for businesses that operate in multiple tax jurisdictions to adequately allocate their resources to effectively manage state and local tax compliance. The result can be as severe as tax penalties, interest charges and overpayment of taxes. Working with you, we develop a solution that draws upon our knowledge of over 80,000 jurisdictions, each with their varied remittance procedures and tax laws. Additionally, our highly experienced IT staff is able to electronically integrate your systems with our technology to create a value-added partnership. The end result is a complete state and local tax management solution.

Compliance Evaluation

The first step in efficiently managing state and local tax compliance is an evaluation of the current situation. As part of this evaluation, OSG looks at the need for improving data collection and reporting systems as well as other factors that influence the ability to identify tax liabilities in a timely and accurate manner.

Correspondence & Defense

Individual jurisdictions will need significant personal attention for filing, hearings or other related issues. With OSG overseeing your state and local tax compliance, you will receive our full attention to the smallest details while you and all related parties maintain open communication with us.

Tax Liability Reconciliation

Determining accurate tax liabilities for financial reporting purposes is more critical today than ever before. That's because Sarbanes Oxley regulations require that companies ensure accuracy. OSG is able to assess your tax accrual processes and, in combination with our compliance review service, determine whether the current accrual process is adequate for accurate financial reporting.

Tax Rating Services

As part of state and local tax compliance services, OSG provides tax rates to facilitate the calculation of taxes related to the taxable receipts that have been reported in a specific jurisdiction. Tax rates are updated monthly to ensure accuracy in collection from customers and in remittance to jurisdictions.

Tax Research & Advisement

Knowledge and expertise are the cornerstones of the OSG Tax Advantage. An individual business may find it difficult to efficiently and effectively research even the most common state and local tax compliance issues. As industry experts, we at OSG continually update and expand our knowledge of current state and local tax laws and compliance issues.

Compliance Watch Services

As state and local tax laws change, it is important to be aware of whether or not your business continues to be in compliance. With the OSG Compliance Watch Services, you can rest assured that a team of professionals is monitoring each state and local jurisdiction that would affect your business
